

Thermal Printer

Instant Billing and Ticketing

The integrated **FWP-30** thermal printer prints text, graphics, and barcodes on plain or pre-printed thermal paper to ensure a fast and professional output.

It also provides for the easy and straight-forward printing of bills, tickets, receipts and labels. The FWP-30 reads "top-of-form" headers to ensure exact printing and alignment of text and graphics.

Part Number	Description of Thermal Printers
128502-000	FWP-30: 3" (75mm) Thermal Printer
128502-001	FWP-30: 3" (75 mm) Thermal Printer with Battery

Laser Scanner

Track and Manage Assets and Inventory

The integrated **FWL-20** Laser Scanner was designed to withstand a wide temperature range and high humidity. The laser scanner is a rear-mounted device which is easy to use with its ergonomic styling and light weight.

Barcode reading is a vital part of data collection for many applications and Radix offers the flexibility and modularity to include printing and barcode reading in a single-unit solution.

Part Number	Description of Laser Scanners
130012-002	FWL-20 Laser Scanner with PCMCIA, Upgrade for the FW900

Imager

Photo Documentation for the Record

The **FWC-20** is an integrated solution for permanent image capture, 1D and 2D barcode reading, signature capture, and Optical Character Recognition (OCR) standards A and B.

This compact, integrated device is optional and when combined with a Radix handheld can be utilized for the capture of signatures, receipts and delivery notes for quality and inspection purposes.

Part Number	Description of Imager
130012-003	FWC-20 Imager for FW900 (Includes: PCMCIA)
